3 global tech communities led • 50+ events hosted • 2,500+ in-person engagements

AHMAD FAROOQ

SENIOR SOFTWARE ENGINEER | FLUTTER • REACT NATIVE • NODE.JS

PROFILE

Senior software engineer specialising in Flutter, React Native and Node.js, with 50+ delivered projects for 30+ clients. Builds products end to end — architecture, backend services, integrations and store release — including two apps published on Google Play and a live commerce operations platform. Leads delivery and mentors junior engineers.

PROFESSIONAL EXPERIENCE

Senior Software Engineer

Tech Solutions

2022 - PRESENT

Remote

- Build and scale enterprise Flutter applications, with an emphasis on performance and cloud infrastructure.
- Architect Node.js and Firebase services on GCP; onboard and mentor new engineers.

Senior Flutter Developer (concurrent)

ITech Computer Institute & Software House

JAN 2021 - PRESENT

Haripur, Pakistan

- Own delivery of Flutter and React Native client apps from architecture through to store release.
- Integrate Google Maps, Stripe payments, push notifications and authentication providers.
- Lead code reviews and set BLoC and Riverpod standards across the mobile team.

Mobile App Developer

Innovation Lab

2021 - 2022

Remote

- Shipped high-traffic mobile solutions for international clients using BLoC, Riverpod and REST APIs.

Freelance Software Engineer

Self-Employed — Fiverr & Direct Clients

2019 - PRESENT

Remote

- Delivered 50+ projects for 30+ international clients across mobile, e-commerce and automation.
- Own the full lifecycle — scoping to deployment — with a 100% client satisfaction rating.

Operations Intern

The Bank of Khyber

DEC 2022 - FEB 2023

Haripur, Pakistan

- Maintained customer records in core banking systems and resolved front-desk queries.

FLAGSHIP PROJECTS

Zyro Cloud

REACT NATIVE • NODE.JS • WHATSAPP AI • META ADS API

AI COMMERCE PLATFORM — LIVE

zyrocloud.com

- Unifies orders, inventory and customers across Shopify, Daraz and WooCommerce in one dashboard.
- Built WhatsApp AI messaging automation, courier tracking and Meta Ads analytics reporting.
- Designed the multi-tenant data model keeping inventory consistent across three platforms.

RouteBuddy

FLUTTER • FIREBASE • GOOGLE MAPS

CARPOOLING — ON GOOGLE PLAY

com.routebuddy.app

- Carpooling app for daily commuters with real-time ride matching and route optimisation.
- Live location tracking, in-app chat and Firebase auth with offline-tolerant sync.

Kardly Branding

FLUTTER • TEMPLATE ENGINE • AUTOMATION

AUTOMATION — ON GOOGLE PLAY

com.kardly.app

- Generates print-ready business cards and letterheads via a template-driven design engine.

ADDITIONAL PROJECTS

SkillBuddy — hyperlocal marketplace linking skilled workers to nearby clients. [Flutter, Firebase]

HomeHaven — property booking with live availability and Stripe payments. [Flutter, NestJS, Stripe]

Dukan e Khata — offline-first ledger with cloud sync and reporting. [Flutter, Drift, Supabase]

Shortify AI — summariser condensing long-form text into structured output. [Flutter, Gemini]

Titan VPN — VPN client with strong encryption and server selection. [Flutter, Networking]

Flappy Dash — arcade game with custom physics and leaderboards. [Flutter, Flame]

Attendance System — final year project automating roll-call via camera. [Python, OpenCV]
