PROFESSIONAL SUMMARY

Full stack engineer with 5+ years building, deploying and running production applications end to end, frequently as the sole technical owner. Builds **AI assistants, voice agents and RAG applications** with OpenAI, Claude and Gemini, alongside Next.js / React frontends, Node.js and Python backends, and Supabase / Firebase data layers. Delivered a live AI-powered CRM, a RAG legal-document system with Slack and Google Calendar automation, and **Zyro Cloud**, a multi-tenant platform that consolidates data from three marketplace APIs into one source of truth. Uses Claude and MCP-based tooling daily and reviews AI output critically before it ships. 50+ projects delivered for 30+ international clients.

TECHNICAL SKILLS

Frontend	Next.js, React, JavaScript (ES6+), HTML5, CSS3, responsive web UI; React Native, Flutter (incl. Flutter Web admin panels); Figma
Backend	Node.js, Express.js, NestJS, Python, REST APIs, webhooks, OAuth, Stripe and local payment gateways
AI & Agents	OpenAI API, Claude / Claude Desktop with MCP servers, Google Gemini API; RAG with embeddings and Pinecone, voice agents with streaming LLM responses, prompt design, AI output review
Automation	Python and Node.js workflows, scheduled jobs, Cloud Functions; integrations with Slack, Google Calendar, Meta Graph API, WhatsApp, Shopify, WooCommerce and Daraz
Data	PostgreSQL, Supabase, Firebase / Firestore, MongoDB, MySQL, Redis; multi-tenant schemas, deduplication, reconciliation
DevOps	Google Cloud Platform, Vercel, Firebase, CI-driven release, monitoring and alerting, Git / GitHub / GitLab, Postman, Jira

PROFESSIONAL EXPERIENCE

Contract & Freelance Full Stack Engineer

2019 – Present · Remote

Direct clients and Fiverr · long-running contracts with Tech Solutions (2022 – present) and Innovation Lab (2021 – 2022)

- Delivered **50+ projects for 30+ international clients** across web, mobile, e-commerce and automation, maintaining a 100% client satisfaction rating.
- Act as sole technical owner from scoping and estimation through architecture, build, deployment, monitoring and handover.
- Architect Node.js, Python and Firebase / Supabase backends on Google Cloud: authentication, data modelling, Cloud Functions and uptime monitoring.
- Build integrations and automations that sync data between client systems and third-party platforms, replacing manual data entry and reporting.
- Collaborate asynchronously with distributed teams across time zones; flag risks early and deliver to sprint commitments.

Mobile Application Developer

Jan 2021 – Present · Haripur

ITech Computer Institute & Software House

- Own delivery of client applications from architecture to production release, including versioning, staged rollout and post-launch support.
- Build React Native and Flutter apps backed by REST APIs, Google Maps, Stripe, push notifications and OAuth providers.
- Improve rendering performance, memory use and startup time across a wide range of device tiers.
- Lead code reviews and set the architecture and state-management standards adopted by the team, shortening onboarding for new developers.
- Mentor junior developers on architecture, debugging and clean implementation.

SELECTED PROJECTS

Parlor — AI Voice Personalities App

GitHub

Next.js · Supabase · LLM streaming · Voice

- Users create AI personalities with their own behaviour and voice, then talk to them by voice or text.
- Streams replies live from a language model and speaks them sentence by sentence; Google sign-in, conversation history and public share links.
- Powers the live "Ask My AI" voice assistant on the portfolio site.

AI Legal Document System (RAG)

GitHub

OpenAI · Pinecone · Embeddings · Slack · Google Calendar

- Retrieval-augmented generation system that ingests DOCX, PDF, image and email files and keeps legal context up to date automatically.
- Runs AI analysis, generates documents and schedules through Google Calendar, all operated from Slack.

Enterprise CRM System

Live · medicare.elite-calls.com

CRM · Automation · Analytics

- CRM with AI-powered insights, workflow automation and customer intelligence, in production use.

Zyro Cloud — AI Commerce Operations Platform

Live · zyrocloud.com

React Native · Node.js · WhatsApp AI · Meta Ads API

- Consolidates orders, inventory and customers from Shopify, Daraz and WooCommerce into one dashboard and single source of truth.
- Designed the multi-tenant data model that keeps inventory consistent across three independent marketplace APIs.
- Built WhatsApp AI messaging automation, courier tracking and automated Meta Ads analytics reporting.

AI Lead Generation Pipeline

In progress

Claude Desktop · MCP (Apify) · Hunter.io · Product Hunt API

- Agentic workflow that discovers early-stage startups, enriches contacts and drafts outreach, orchestrated through Claude with MCP servers.

BuddyCart.pk — E-commerce Store

Live · buddycartpk.com

PHP · MySQL · Meta Graph API · WhatsApp

- Custom store with automated Facebook and Instagram posting via the Meta Graph API, WhatsApp order notifications and JazzCash / Easypaisa checkout.

RouteBuddy — Carpooling Platform

Live · Google Play

Flutter · Firebase · Flutter Web admin panel · Google Maps

- Built the mobile app, Firebase backend and a web admin panel for user management, verification, ride oversight and moderation.
- Real-time ride matching, fare bidding, local payments (JazzCash, Easypaisa, Safepay) and a Roman Urdu AI assistant.

Also built: Shortify AI (Gemini summariser) · Automated trading system (Python, Alpaca) · Kardly Branding (Google Play) · Dukan e Khata (offline-first ledger, Supabase) · HomeHaven (NestJS + Stripe) · SkillBuddy (hyperlocal marketplace)

EDUCATION & CERTIFICATIONS

BS Computer Science — University of Haripur

2018 – 2022

CGPA 3.26 / 4.00 · Final year project: camera-based automated attendance system (Python, OpenCV)

- Flutter Application Development — WsCube Tech (2019)
- Android Development and Programming Fundamentals (PFTP), 2022
